WHY CARE ABOUT WATER

*We
need to remind
ourselves that saving
water helps to preserve our
environment:* reduce the
energy required to process
and deliver it to homes,
businesses, farms, and
communities, which
eventually helps to reduce
pollution.

Water is one of the most **undervalued resource** in the world which is taken for granted very often. Some of it gets wasted by our own negligence and at times it is the machines, the tools and the equipment around us that do not use it judiciously.
